Modernizing Your Safety Training - Trends, Facts and How To's

Current methods of safety training are lagging behind changes in employee learning styles. The approach and delivery are outdated and inadequate. They do not meet the expectations employers have around employees retaining information and avoiding injury. It is time to wake up, shake it up and modernize your safety program. This session provides information about why training methods require modernizing and how to accomplish this task in your safety training.

How to Successfully Use Baby Boomers and Generation X to Train Millennials on “Your Company’s Way” of Getting the Job Done Right and Safe.

In this session, we will discuss and present practical tips for transferring knowledge from Baby Boomers (1946-1964) and Generation X (1965-1980) to Generation Y also known as Millennials (1981-2000). The landscape is complicated, and it is critical that you understand the learning style gaps between generations. Attend this session to gain valuable insights into practical ways you can close these gaps, ultimately helping your employees transfer valuable knowledge between generations.

Emerging trends in Safety Technology

Across the board, employers are discovering and increasing their use of emerging technologies to enhance employee safety. In this session, you will gain valuable insights into safety technology ranging from Virtual and Augmented reality to in-field wearable safety devices. This is a great opportunity to start your thinking "outside the box" to traditional training approaches and in field safety devices.
